

# HCN PCN

INTRODUCTION TO ARRS ROLES

# PCN Vision

---

Our vision is to create a patient care system that includes everyone.

---

A system where member practices work closely together and in collaboration with health and social care, voluntary sectors, community groups and local people to deliver efficient and timely personalised care.

---

To make the best use of available resources to ensure that everyone gets the right support, in the right place, at the right time.

---

We strive to sincerely and honestly support our patient to holistically achieve their goals in the light of evidence-based medicine

# Types of ARRS roles
